

PRE-CARE INSTRUCTIONS FOR SCALP MICROPIGMENTATION (SMP) CUSTOMERS

We want to thank you for choosing to have your scalp micropigmentation procedure with SCALPS. In order for the treatment to be 100% successful, we strongly encourage you to follow the pre-care instructions listed below.

PRE-CARE INSTRUCTIONS:

- 7 days before your expected treatment, start applying a moisturizer cream, such as, Coconut Butter or Nivea After-Sun moisturizer nightly, and wash out in the morning.
- Do NOT apply anything to your scalp on the day of your procedure.
- If you currently use any hair concealers, DO NOT apply on the day of treatment.
- If you are using a hair system, bring a hat with you on the day of the treatment.
- Do not consume alcohol or drugs before the treatment, with the exception of medication prescribed by your doctor.
- Drink and eat something prior to your arrival.
- Please arrive on time for your appointment.

THE DAY BEFORE YOUR PROCEDURE

- The night before your procedure, exfoliate your scalp before you go to bed.
- Get a haircut to the length discussed with your practitioner during your consultation. For a regular SMP procedure, the suggested length is a #00 or #0 with a buzzer. For a Hair Thickening procedure, cut your hair to the length you would normally wear it.
- Do NOT razor-shave your scalp.
